

PRODUCT DATA SHEET

Article No. 64.301.0 - Barani Low S1P HRO SRC

Protection: fiberglass cap and flexible FAP® midsole
Plus: metal free, molded toecap protection
Upper: suede leather
Lining: BreathActive functional lining
Footbed: evercushion® BA
Sole: rubber sole URBAN with idCELL and Rotation Point System, 300°C heat resistant
Sizes / Width: 39 - 47 / 11

Rubber outsole URBAN

This 300° C heat resistant HRO rubber outsole with its differently shaped profile elements offers optimal mobility and safe contact with the ground. Due to the increase of the rotation point, friction and thus tiredness can be significantly reduced.

FiberglassCap

The new developed high tech fiberglass toe cap for optimized protection and enhanced flexibility.

idCell

The idCELL element in the heel area consists of a very soft sponge EVA midsole and perfectly absorbs impacts and shocks when the heel strikes the ground.

EVA midsole

We injected billions of tiny bubbles in this ultra lightweight midsole for an optimal cushioning and an improved flexing action of the foot.

evercushion® BA

This anatomically designed footbed provides a high level of comfort and moisture control, giving a pleasant foot climate. This footbed, as used in high performance sports shoes, is made from a soft, opencell, resilient foam that will not compress in wear, which assures a high level of cushioning, breathability and moisture regulation.

Upper

Areas to especially high wear are made of durable leather. The combination with resistant micro-fiber and textile inserts makes this upper particularly resilient.
